

How can I see the message my supporters text with a keyword?

Last Modified on 07/02/2020 9:02 am PDT

Supporters who text a keyword followed by a name, number or message are captured inside your MobileCause account. Typically, these messages are prompted by the speaker at events to be displayed on the fundraising thermometer.

Messages can be included with any keyword.

To view messages click the **Communication & Marketing** menu, then **Messages**.

Then click **Inbox** on the left side.

All responses can be viewed by clicking on the **keyword** associated with the message.
